Nibor - Subscription fees 2022 - Unchanged

The subscription fees for access to Nibor will for 2022 be kept at the levels introduced for 2020.

NoRe has decided subscription fees for 2022 equal to the fees applicable for 2021. This is the second year in a row that the fees are kept unchanged.

However, Nibor has been recognized by the EU Commission as a critical benchmark according to the EU Benchmarks Regulation. This decision is expected to be included in the EEA-agreement shortly. As an enhanced regulatory regime applies to critical benchmarks under BMR, the Nibor fees are likely to be adjusted with effect from 2023. Information about the assessments behind the decision to recognize Nibor as a critical benchmark is provided in the [EU Commission Implementing Regulation 2021/1122 of 8 July 2021](#).
